## Summary

I am a second-year graduate student at the University of Southern California, pursuing a Masters in Computer Science. I have a strong background in full-stack development and extensive experience with React, Angular, Node.js, Java Spring Boot, and SwiftUI. I am passionate about software development and thrive on building innovative applications. I am currently seeking a co-op or entry-level Software Engineering position to further enhance my skills and contribute to impactful projects.

## Education

**University of Southern California**

*Master of Science in Computer Science*

**GPA:** 4.0/4.0

**Aug. 2023 – May 2025 (expected)**

*Los Angeles, CA*

**Maulana Abul Kalam Azad University Of Technology**

*Bachelor of Technology in Computer Science and Engineering*

**GPA:** 9.31/10.0

**Aug. 2019 – Jul. 2023**

*Kolkata, India*

## Relevant Coursework

- Data Structures
- Database Systems
- Artificial Intelligence
- Security Systems
- Analysis of Algorithms
- Web Technologies
- Machine Learning
- Computer Networks

## Experience

**Cognizant** 📄

*Fullstack Developer Intern*

**Apr. 2022 – Jun. 2022**

*Kolkata, India*

- **Completed intensive training in React and Java Spring Boot:** Engaged in structured internship program focused on mastering React.js and Java Spring Boot frameworks, gaining proficiency in frontend and backend development concepts.
- **Demonstrated proficiency through hands-on exercises and assignments:** Applied theoretical knowledge to practical learning activities, including coding exercises and projects, to develop skills in building modern web applications.
- **Received mentorship and guidance from industry professionals:** Benefited from mentorship by experienced software developers, troubleshooting challenges and enhancing technical skills in a supportive learning environment.

## Technical Skills

**Languages:** Java, Javascript, Python, Typescript, Swift, C, C++, SQL, HTML, CSS

**Frameworks:** Node.js, Express, Next.js, Angular, React, SwiftUI, Spring Boot

**Databases:** MySQL, MongoDB, PostgreSQL, Oracle, SQLite

**Tools:** Git, Github, VS Code, Postman, Maven, Microsoft Office, LaTeX

## Projects

**Stock Summary iOS Application** 📄

*Swift, SwiftUI, Finnhub, HighCharts*

- Developed an iOS stock tracking app using Swift and SwiftUI, integrating Finnhub API for real-time stock data.
- Implemented data visualization with Highcharts, creating interactive graphs for easy stock data analysis.
- Enhanced user engagement with favorite stocks tracking and simulated trading, allowing users to track prices and simulate buying/selling with a wallet balance.

**Stock Summary Single Page Web Application** 📄

*Typescript, Angular, Nodejs, Express, MongoDB, Finnhub, HighCharts*

- Developed a single-page web application utilizing Angular and Finnhub API for real-time stock data.
- Attempted website optimization using RxJS pipelines and Angular route caching to minimize network requests by 50%.
- Designed a RESTful API with Node.js, Express, and MongoDB for efficient data management, ensuring responsiveness and user-friendly interface with HighCharts for interactive visualization.

**Social Media REST API** 📄

*Javascript, Node.js, Express, MongoDB, Passport.js*

- Developed a versatile API for user interactions, leveraging Passport.js for secure authentication and access control.
- Utilized Mongoose for MongoDB connectivity, optimizing schema design for efficient data management.
- Established CRUD endpoints for seamless user interactions with social media content.

## Achievements

- Secured 1st position for two consecutive years in a coding competition at the state level, competing against 40+ colleges and 450+ participants.
